

cityEHR User Group Meeting

St Edmund Hall, Oxford
Friday 20th September, 2013
cityehr.eventbrite.com

The first cityEHR User Group Meeting will bring together people from around the UK who have been using, configuring or conducting research with the open source cityEHR health records system. The meeting will be an opportunity to review the history and current capabilities of the cityEHR and to discuss the future product roadmap.

The meeting is being run alongside the XML Summer School which is a week-long event 15th-20th September covering much of the background technology used in the cityEHR including XML, XSLT, XQuery and OWL. See www.xmlsummerschool.com for details of this event. Special discounts at the XML Summer School are available for attendees of the user group meeting.

The user group will meet on Friday 20th September and will be preceded by a hands-on workshop on Thursday 19th for anyone wanting to take a look under the covers of the system.

Workshop - Thursday 19th September

09-30 *installing the cityEHR*
11-00 *coffee break*
11-30 *using information models*
13-00 *lunch break*
